Local Financiers Want Custom of Depositing \$4,000,000 With National Institutions Continued.

Plea of Chairman of Clearing House Committee-No Life in Washington Stocks.

#### BY I. A. FLEMING.

Washington bankers are decidedly in terested in the decision which the Treasury Department will make within redepositing a large part of the tax collections for the fiscal years in the District in the national banks, as in

former years.

W. T. Galliher, president of the American National Bank, is chairman of a committee appointed by the Clearing House Association to wait on the Secretary of the Treasury and present the claims of the banks for the ontinuation of the lond-standing custom of depositing \$4,000,000 of tax funds in the District banks, to be repaid. 20 per cent in July, 20 per cent in August, and thereafter 10 per cent a month, funds bearing interest at : per cent and secured by deposits of securities acceptable to the department at 75 per cent of their market

of the Treasury, Mr. Galliher took the matter up with Mr. Malburn, assistan matter up with Mr. Malburn, assistant secretary, who, in turn, consulted with Mr. McAdoo on the matter, following which he wrote to Mr. Galliher asking the latter for his views on the proposition and as to whether the money was actually needed by the banks, etc.

Mr. Galliher replied at some length, setting for the facts in the case; that these funds were strictly District moneys and, therefore, entirely different from government deposits; that the withdrawal of \$6,000.000 to \$7,000.000 from the banks by the taxpayers of the District had always been effective in

District had always been effective in reducing the available surplus of local

reducing the available surplus of local fiscal institutions, and that the redeposit of \$4,000,000 by the Treasury Department had been considered an essential relief to the situation.

He also called attention to the fact that the new plan of assessment was effective and that this probably would cause larger taxes, while the action of the government in transferring its moneys to the federal reserve system, now fairly under way, was another reason why the tax funds should be returned to the national banks as usual, if not in larger proportion, to be withdrawn as the government needs the cash.

cash.

Discussing the matter of actual need of surplus funds by banks, Mr. Galliher practically admitted that just at this time there was a plethora of cash, but with government deposits being withdrawn, with the millions of tax money taken out and the probable bettermen business, the chances were that the ax denosits could be used to advan tage. Moreover, he called attention to the fact that the summer months were not periods of saving on the part of the people of the District, but of liberal

NEW YORK.

NEW YORK, April 28.—The cotton market opened steady at a decline of 5 to 9 points today in response to lower Liverpool cables, selling by houses with continental connection and under a renewal of the local realizing or reactionary movement which developed here yesterday. There was a fair scattering demand, however, which may have been partly based on continued dry weather in the eastern belt, further unfavorable reports from the southwest and expectations of a bullish weekly weather report at midday, and prices rallied shortly after the opening, with July and later deliveries selling a point or two above last night's closing figures. May was relatively quiet.

Futures opened steady: May, 16.01; July, 16.28; October, 16.62; December, 16.78; January, 16.80; March, 11.00.

The advance from the early low point carried active months about 3 to 8 points net higher, with new crop deliveries relatively firm on covering, southern and other commission house hugher. Russiness how. tively firm on covering, southern and other commission house buying. Business, how ever, was comparatively quiet, and prices later eased off 3 or 4 points from the best under renewed realizing. The weekly weather report was commented upon bull-ishly, but seemed to inspire no immediate demand of consequence.

Lightness of offerings rallied the corn market from weakness that was due to market from weakness that was due to sympathy with wheat. Cash demand seemed to have improved to a notice-able extent. Opening prices, which varied from ½ to ½ decline, were followed by some net gains.

Shorts quickly absorbed offerings of oats. Accordingly, the market more than recovered an early advance.

Firmness in the price of hogs tended to harden provisions. The volume of business, though, was rather small.

Later a sharp wheat bulge took place after reports that the Germans were
